SPHEREx and PUNCH Launch

Space agency/country: SpaceX
Mission: *SPHEREx* and *PUNCH*

On 12 March 2025, SpaceX successfully launched two science missions from Space Launch Complex 4E (California, USA). *SPHEREx* is an astrophysics mission that will survey the sky for two years, hoping to find answers to fundamental questions such as those related to the birth of the Universe and the development of galaxies. *PUNCH* is a NASA mission which aims to study the mass and energy of the Sun's corona, and how it fills the solar system.
